FUTURE OPPORTUNITIES AND CAREERS

At a recent talk, the experts predicted that future of professional careers would be outside some of the current areas. Professional areas likely to develop are in:

- Engineering**—many new areas developing
- Sciences**
- Agriculture**
- Health**—sciences and services areas

Having high level university qualifications in these areas open up professional and business opportunities. Canning College provides the university access courses for suitably qualified and motivated students.

UWA, Curtin, ECU and Murdoch offer an extensive range of courses and majors which will provide students with future opportunities.
